

THE WORLD OVER

NORTHERN RAIL SERVICE OPEN

BRILLIANT CHILD LIVES 27 DAYS

DOUKHOBOV JAM PLANT BURNS

POWER CONFERENCE COLLAPSES

ETHIOPIA PREPARES FOR FRAY

EDMONTON—Resumption of northern train service approximately on schedule for the first time in several weeks on both Waterways and Peace River routes was announced by northern Alberta railway officials this week.

NEW YORK—A baby boy lived 27 days after birth with only half in the cranial cavity instead of a developed brain. It was revealed after an autopsy. A member of the hospital staff said that the case was rare in medical history, and that for the first six days of life the infant was apparently normal. Despite the belief that behavior is dictated by the brain, he said, the child was regularly, cried lustily and moved his limbs freely.

GRAND FORK, N. D.—The fire-fighting plan of the Christian Community of Universal Brotherhood, a Doukhobor organization, was in ruins on Monday with the damage estimated at \$50,000, including a loss of 40,000 lbs. of grain valued at \$20,000 being laid awaiting claims.

PARIS—The three-power conference seemed to avert an Italo-Ethiopian war, collapsed on Monday and President Laval of France announced it had "adjourned." Further negotiations will continue through diplomatic channels.

Colloquies of the conference was announced officially a few hours after Premier Mussolini of Italy had returned an indifferent "no" to an Anglo-British proposal for partial Italian control of Ethiopia.

ADDIS ABABA—Thousands of bare feet, moving with military precision, passed on Ethiopia's main highway, the threat of Italian invasion as high as the "King of Kings" declared:

"If war must come, we will be prepared. Throughout the century Ethiopia has never been conquered. She shall not be vanquished now."

Within the shadow of foreign troops and elsewhere in the capital the thousands of unshod recruits drilled tirelessly.

Quantities of arms and munitions reported to be reaching Ethiopia through the Sudan, were said to be far short of what was needed in view of the demands of eager tribesmen for rifles and bullets.

WILL ROGERS, WYLET POST

POINT BARROW, Alaska—Death, reaching through an Arctic fog, overtook Will Rogers, peerless comedian and Wyley Post, master aviator, as their rebuilt plane faltered and fell into an open icy river last Thursday. They had just taken off for a ten-mile flight from their river position to Point Barrow. Sixty feet in the air the motor faltered and the plane crashed, taking Rogers and Post to their deaths.

A terrified Eskimo ran 15 miles to Point Barrow with the news of the crash, but by the time help arrived the bodies of the doomed men had been taken from the wreck by the natives.

The world mourns the famous comedian and aviator, who have given much to civilization, and their places in this world can never be duplicated.

BENNETT SETS ELECTION DATE AT OCTOBER 14

Necessary for Government to Change Thanksgiving Date to Oct. 21

WRITS RETURNABLE NOV. 9

After effecting a partial reconstruction of his cabinet, involving the sacking of four ministers, Prime Minister R.B. Bennett on Wednesday last secured dissolution of the 17th Parliament since Confederation. He then announced that a general election would take place on Monday, October 14th. Writs for the election were issued on August 16th, and are returnable on Saturday, November 9th. Party standings in the House of Commons at dissolution, with vacancies, was as follows: Conservatives, 113; Liberals, 88; Liberal Progressives, three; Progressives, two; United Farmers of Alberta, nine; Labor, three; Independent Labor, one; Independents, two, and vacancies 24.

It was necessary for the government to pass an order-in-council rescinding that passed a few weeks ago, fixing October 14th as Thanksgiving Day, and changing the national holiday to October 21st. Originally it had been planned to hold the elections on September 26th, and it was with this date in view that the holiday in question was at first fixed upon.

SOCIAL CREDIT DEBATER FAILS TO SHOW-UP, ACME

About 500 people gathered at Acme last Friday night to hear the debate advertised between D.J. McLeod, of Calgary, and A.B. Clapp, C.F.A. Independent candidate, on Social Credit.

After opening the meeting Mr. Elliott of Seabrook read a telegram received from D.J. McLeod, the challenger, as follows:

"I regret last minute development forces presence in Calgary Friday evening, no choice. Suggest alternative column Calgary Herald for our discussion with limit two articles, each discussion to be completed in Wednesday paper later. If satisfactory present 'Palmer' to paper over, am ready. D.J. McLeod."

After reading all the correspondence including the previous telegram, dated August 14, in which McLeod stated the death of a friend and the chance of a position might prevent his presence, Dr. Elliott stated that he would have the audience to draw their own conclusions.

GOOD AUTO CAMP IS REAL ASSET IN ALL TOWNS

At a time when progress is being made in completing this season in all-weather highway to Jasper National Park, while other camps are linked by road connections of a similar standard, visitors are going to be interested more than ever in the auto camp facilities available in this province.

One of the first questions is in relation to the auto camps. People want to know where they are located, and what they have to offer. Officials of the Alberta Motor Association are urging that municipal authorities, business men's associations and others give immediate attention to auto camp accommodation. Towns which do not have such camps would do well to see that they are established as without delay, if only on a limited scale this season.

Some pupils don't like their teacher because they think teacher wants to know too much.

Andrew Davidson Chosen Conservative Candidate

THIS NEWSPAPER...

Which circulates mainly in your community, is endeavoring to give you a newspaper service, which everyone can enjoy. This can best be accomplished by your co-operation in sending in news, using its advertising columns and making use of our up-to-date printing department.

Conservatives of this federal riding, Bow River, last Thursday night chose Mayor Andrew Davidson of Calgary for their candidate in the October elections.

The selection was made after the only other nominee, Dr. Dawson Graham, of Drumheller, with the consent of the donors, withdrew.

The meeting, attended by about 400 persons accepted unanimously the final choice of Mayor Davidson, who was sponsored by W. Ordinger Sr. of Okotoks, and W.M. Thompson of Rosedale.

Mayor Davidson expressed his sincere thanks to the meeting and declared in his opinion a man need make no apology for being a Conservative candidate, particularly in view of the administration of that party during the past term. He told his audience that he had not sought the nomination—he had been approached.

Thom's Sketch of
MR. HON. R. B. BENNETT

Prime minister of Canada, who last Thursday announced that the date of the Federal General Election would be Monday, October 14th. See news story for further particulars.

BANK MONT' CROP REPORT

Editor will be found a brief synopsis of the crop reports received by the Head Office of the Bank of Montreal from its branches.

General—Harvesting of grain has begun in the Prairie provinces and will be general within ten days to two weeks (at date issued, Aug. 15).

In Manitoba and eastern Saskatchewan the severe damage done to the wheat crop by rust is becoming increasingly apparent. In most areas of Alberta crops are progressing favorably. In Quebec grain and root crop and pasture are abundant. In Western and southern Ontario harvesting of grain has been delayed by frequent rains but throughout the Province a heavy crop has been saved despite showery weather. Most other crops are doing well. In the Maritime Provinces conditions are somewhat patchy. The hay harvest has been completed and grains are ripening fast. In British Columbia winter settled weather following heavy rains is benefiting crops considerably and a good yield of grain is anticipated. Details follow:

Alberta—Crops are maturing satisfactorily but are late in the northern and central areas and cutting will not be general for two weeks. Prospects continue favourable except in the south where light returns are indicated. The best crop is an average one.

Saskatchewan—Crops are ripening rapidly and cutting will be well under way in a week. But infection continues to spread and damage to the wheat crop will be heavy in the south east and west central areas. Drought has taken heavy toll in the western and northern areas. Cane crops are patchy but feed will be sufficient in most districts.

Manitoba—Wheat cutting is fairly general, but owing to the damage from rust the crop will be light and of poor grade. A fair yield of corn grain is expected, although they also have been affected by rust and lodging. Hay is plentiful.

Ontario—The leading grain has been in operation might well stand some overhauling and improvements.

The leading grain has been in operation might well stand some overhauling and improvements.

ALEX REID LOSES SHEEP WHEN DOGS VISIT FARM

Police Dogs Kill or Wound About 90 Head of Sheep

On awakening early Monday morning a farm hand employed by Alex Reid noticed a commotion in the sheep pen and upon investigating found two police dogs enjoying themselves at the mercy of the sheep—killing, injuring and maiming. The man rushed into the house, secured a gun and succeeded in killing one of the dogs but the other escaped and was followed to town, where it was later disposed of.

On reviewing the damage it was found that about a dozen head of sheep had been killed and between 70 and 80 injured, many of which had to be destroyed later.

The dogs showed no mercy, killing lambs, ewes and rams, wherever they passed in their path, and Mr. Reid reports that he lost many valuable breeding animals in the slaughter.

This is not the first time that dogs have killed sheep in the district. About three weeks ago Mr. Shaw reported that sheep had been killed by dogs and at the time he lost a number of animals.

Since the above damage has been reported a number of dogs roaming at large without licenses have been destroyed, but it appears that this season is to be topped more dramatic losses must be made and a few more of the canine tribe disposed of.

Have You Met?

Mr. Penrich is one of the best-known pursers in (trans-Atlantic service), and during his long service with the Canadian Pacific has made friends with thousands of regular travellers. He was many years in the Empire of Scotland, and has been found the world so often that place like Bombay and Hong-Kong are as familiar to him as the rose-filled garden of his Southampton home.

pressed with the need of commencing without delay to build up an attractive auto camp. It is an investment in a cash business that will very soon return, while it is possible that there is no finer type of advantageous advertising than that which gives content to a local auto camp. It sends people away delighted, and the delighted ones invariably return.

CFAC TO BROADCAST RETURNS

Provincial election returns will be broadcast to the radio audience on August 22nd by CFAC, according to an announcement made by officials of that station.

Returns will be broadcast as soon as they are received tonight, and the station will stay on the air until the last poll has been checked. Special programs will be presented during intervals between election returns.

COUNCIL DONATES "FOUND MONEY" TO CEMETERY

At the regular monthly meeting of the Village council, held in the office of the Secretary last Tuesday evening, two councillors were present and little business was done.

Some weeks ago the Village was notified that the sum of \$40.47 was on credit in a bank at Three Hills, and had been there for more than twenty years. This sum had been transferred to the account at Carbon, and the Councillors decided to turn the money over for the benefit of the local cemetery.

The money in question had been placed on credit to the Village at the time that Jas. Baird and Al. McLeod were councillors, and had, long since been forgotten.

WHITE WOLF SHOT IN ALBERTA

CHEROKEE, Alta.—When Harold Anderson saw a thumper wolf, almost pure white in color, running round the home pasture on his ranch, he thought it was a goodly catch. The wolf, the largest pure shot he, slushed a hound dog before being killed. Its pelt measured six feet, one inch.

CARBON TENNIS NOTES

Carbon and Seabrook Junior Girls Meet in Interesting Match

The Junior Girls of the Seabrook Tennis Club visited Carbon on August 14th and played an interesting match with the Junior Girls of the Carbon Lawn Tennis Club. The result was a win for the Carbon girls, who took all three of the Singles matches, the Doubles not being finished owing to rain.

Following are the results and scores:

Girls' Singles—Miss A. Lemay, Carbon, defeated Miss E. Elliott, Seabrook, 6-2, 6-4. Miss B. McQuade, Carbon, defeated Miss F. Moss, Seabrook, 6-3, 5-6, 6-4. Miss A. Rierley, Carbon, defeated Miss B. Wytema, Seabrook, 6-4, 6-2. Girls' Doubles—Misses A. Lemay and A. Rierley, Carbon, beat Misses E. Elliott and B. Wytema, Seabrook, 6-0, 4-1. When rain stopped the play, Misses B. McQuade and E. Tormance of Carbon, versus Misses E. Elliott and F. Moss, Seabrook, not played.

SURVEY MADE OF CHEMICAL WEED KILLERS

The sixth of a series of studies dealing with weed research and control has been issued by the Northwest Grain Growers Association. This pamphlet deals with chemical weed killers and is the result of research conducted by Dr. G.P. Macdonald, professor of Agronomy, University of Manitoba, and Mr. W. Tildesley, M.Sc., Assistant on Weed Research, and financed by the chemical manufacturers.

The pamphlet deals with proper chemical use in weed destruction. It outlines methods of mixing to avoid

WHEAT CUTTING MAY BE GENERAL FIRST OF WEEK

Farmers Again Cutting Cane Groves and Many Starting on Wheat

WARM WEATHER HERE

After a week's delay by wet weather and rain, farmers in the district are again at work with the binder gathering their cane groves, and much of this variety of feed has now been stocked.

What has not been threshed as fast as many had hoped, but there has been ample time to fill the barns. In the latter half of this year, and later harvesting can be expected.

To the south a number of farmers are now preparing to harvest their wheat, while others have already commenced, although it is said that some of the wheat is still on the green side. By Monday are the present weather conditions, most of the farmers in the southern part of the district will be out cutting wheat, but in the north the crop is heavier and somewhat later and many claim that it will be about ten weeks before the wheat will be sufficiently mature to cut. The crops, however, are heavy, and many fields will run well over the 50 bushel mark this year.

The frost which visited the district about a week ago did some damage to gardens in the lower levels, but as far as no damage to wheat has been reported, and with the most wintering and warmer weather being experienced it is to be hoped that no damage from this cause will be done.

Less stores are now beginning to take on the busy appearance and the farmers are patronizing the home merchant to a large extent. By doing so they are getting the goods they want at reasonable prices, and there is no wasting of time and delay by sending money in to their nearest neighbour. The stores in Carbon carry good stocks and a continuation of this patronage will be appreciated by them.

Incising body and clothing. Manner of growing, when to apply, and effect on grain yields are set forth.

Summarizing the results of the survey, the pamphlet states:

1. The use of chemical weed killers is only justified where cultivation can not be properly done, or where it has proven ineffective.
2. Some annual weeds can be successfully and profitably controlled in growing crops.
3. The profitable use of chemical for the control of perennial weeds is confined almost entirely to the treatment of water-saturated pastures.
4. Fertilizers, properly applied, are a material aid in lessening the weed menace in the common cereal crops.
5. Copies of this booklet can be obtained free of charge, from any lime elevator agent or by writing to the Northwest Grain Growers Association, at Winnipeg.

Nature Upsets Man's Plans

Harvest time in Western Canada has again arrived and for the next few weeks great activity, from early morning till late night, will be the rule right across these western plains. Following several years of short crops, and in many sections complete failure of crops due to drought, and consequently lack of resources on the part of tens of thousands of farmers to seed and harvest a crop this year, governments and municipalities, banks, mortgage, loan and implement companies made provision whereby farmers were supplied with seed, fodder, stock, gas and oil, machinery repairs, hired time, and other essentials to the seeding and harvesting of a crop. Each individual farmer may not have received all that he desired, but, speaking broadly, the needs of the situation were fairly well met.

Taking the country as a whole, and excepting certain more or less restricted areas, copious rains have fallen throughout the growing season, following a somewhat late seeding. Up to a few weeks ago prospects for at least a normal, if not above normal crop, were bright. Grasshoppers did cut worms which were at first threatened, seemed to have been brought under control, weather conditions prevailing being a man's factor to that end. Prospects for a fairly large and satisfactory crop were excellent, and estimates of as high as 500,000,000 to 600,000,000 bushels of wheat were commonly made.

But last night the bright picture became clouded as rust made its appearance in the wheat fields, coming in from the southeast and spreading rapidly westward and northward. Governments, financial concerns, economic planners, farmers, every human agency is powerless against this development of Nature. For years technical agricultural experts, chemists and scientists employed by governments, have been working means to offset the ravages of rust and to develop a strain of wheat that will be rust-resistant. But Nature this year has defied all their efforts, and it is now self-evident that Western farmers will sustain heavy losses through the effect of rusted crops.

Estimates of the loss through rust already run as high as 100,000,000 bushels of wheat; some estimates are even higher, and, of course, the actual loss will not be known until the harvest is over. On many farms, even in some municipalities, no wheat will be harvested.

There is no desire to be alarmed in reviewing this situation. Notwithstanding the inroads by rust upon what a few weeks ago was one of the most promising crops in many years, the general agricultural situation is decidedly better than for some years past. Grass again covers great areas of the West which recently presented a desert-like appearance. Feed and fodder formerly lacking are now available. Cattle and sheep are generally reported to be good. But the big cash crop of the West, wheat, will be smaller and of decidedly less value than was hoped for and expected a few weeks ago.

The whole country must face this unfortunate fact and meet it to the best of its ability. No human agency can be held responsible for the losses sustained. It was beyond Governments, corporations, and individuals alike to prevent. All will be included in the losses sustained—Governments through loss of revenues and the necessity of providing assistance where it was not anticipated it would be necessary; railways through loss of traffic and therefore loss of revenues; railway, elevator, machine company and other employees, including farm laborers, through less employment; financial concerns to whom money for advances made is owing but which cannot be paid as fully as was anticipated; farmers more especially because the returns for their labor are swept away or very largely reduced. In a word, no existing political, financial, economic, or social system is responsible for the heavy losses the country is sustaining. Nature and conditions developed under its inescapable laws are the sole cause.

But Nature is not always unkind. In the long run it always strikes a fair balance. Its laws operate not for one year, but through cycles of years. Man must not only recognize this truth, but govern himself accordingly. There is no good cause to be served by becoming despondent and discouraged. There is only one courageous thing to do, and that is to face the situation and the problems presented. Losses to-day will be compensated for by gains to-morrow. There is a law of Nature. Therefore, the future should be faced with courage and determination. Life is a battle and must be fought. Man could not exist on "flowery beds of ease." If he is to succeed and reach the topmost rungs of the ladder of life, he must exert himself and climb, battling against all obstructions in his way, indicating the weeds that cling and clog his steps, removing weaknesses and strengthening the ladder. Climbing he will become stronger; crouching at the foot of the ladder, waiting for some one to help him up, he will become flabby and weak and eventually succumb. Courage and determination, which will bring confidence, is essential to success in any walk of life. And in the long run Nature will not bar the way, rather it will be found helpful and co-operating.

Wood Ready For Use

Germany Has Treatment To Season Trees While Growing

Telegraph poles, railway ties and other heavy wood necessities may be grown to order by a treatment which has just been discovered in Germany. Trees are made to season themselves as they grow. The treatment is ready for immediate use. A bore hole is made in the tree trunk, and a special chemical solution containing arsenic and other salts is injected into the living tree. These chemicals enter the sap stream of the tree, and are gradually carried to the ends of the highest branches. The tree does not survive the treatment very long, but as it dies it becomes thoroughly saturated with preservative and can be used on railroads or for telegraphs and telephones without any of the usual treatment.

Serves Double Purpose

Balloon Which Turns Into Parachute Tested Near Moscow

A "parachute balloon," designed to change its form in the air and to descend as a parachute, has made its first experimental flight from the field of the government dirigible factory near Moscow. The pilots, Modestoff and Lioff, were ordered to ascend 10,000 feet, then to open the valve, permitting the gas to escape. The underpart of the bag, designed to fold upward in such a manner as the bag gradually takes the form of a parachute.

Keep cast-iron work in good condition by rubbing with blacklead.

Trying For New Record

Speed Of 300 M.P.H. Is Sir Malcolm Campbell's Aim

A circus of record breaking under the boiling sun on Utah's salt desert, planned as the greatest show in the history of automobile speed racing, is the September aim of Sir Malcolm Campbell and Captain George Eyston, Britain's swiftest drivers.

The speed kings announced plans to sail together, Sir Malcolm to shoot again at his dream of 300 miles an hour in the veteran Bluebird, Eyston to tackle every mile between that one and 24 hours.

Filled with glowing accounts of the Bonneville salt flats surface by his friend, John Cobb, who recently set 21 new records there, Campbell is confident that old Lady Bluebird, the six-ton thunder wagon that roared to the present land speed record of 276.810 on the sands of Daytona Beach last winter, finally will carry him this time over a mile in 12 seconds flat—300 miles an hour.

"I'm sure I'll beat 300 this time," Campbell said. "Then I'll chuck racing and stick to business."

The 50-year-old Englishman who has challenged to-day for speed over a measured mile has made a few alterations in the Bluebird since his return from Florida. Campbell, who in the past nine years has set 200 records, more than any other living man, will alter, record tries with Campbell. Eyston will drive a freestone looking front-drive juggernaut, powered with a 440-horsepower Rolls Royce automobile. Its tanks carry 200 gallons of gasoline, giving it a 500-mile range without refueling. Eyston believes he can average 100 miles an hour or higher for 24 hours, and in briefing Albert Denry along to drive relief.

Fingerprints By Radio

Experiments Have Shown Great Improvement In Results Obtained by Transmission of Fingerprints by Radio is the latest link between science and criminal detection—a link that has been more strongly forged by Scotland Yard every day.

Experiments were begun several months ago. Although not yet regarded as an every day practical business, considerable improvement has recently been made in the results obtained.

At first the images were blurred, even when sent from enlarged prints, but greater technical experience is gradually overcoming this difficulty.

The time is very near when in urgent cases, portable apparatus will be used to transmit fingerprints direct from the scene of the crime to Scotland Yard records, it was predicted.

As the technique of wired and radio transmission improves, it will be possible to send life-size fingerprint photographs speedily over any distance. The police station at York rapidly turns new scientific inventions to its own use in the fight against crime. The fingerprinting of the famed investigating department, Lord Trenchard, has had much to do with the reorganization plans.

Demand For Homespun

Women In Quebec Are Kept Busy Filling Orders

Spinning wheels and hand looms in the district around Murray Bay, Quebec, are kept busy as the housewives try to fill demands of the fashionable world for homespun fabrics.

For years Murray Bay has been famous as the home of homespun. Its fine, soft blankets and candlewick spreads have been carried away by tourists to far parts of Canada, the United States and Europe. This year there are still the blankets, spreads and hooded rugs, but the range is for homespun, sport jackets which suits and skirts, sport jackets and coats are being made.

Much of the spin of the new fabrics is in their natural coloring and weaves. Colors are from natural dyes, the habitation women making the fabric from beginning to end.

Though women are doing most of the buying of habitation men are also using them for sports wear.

Making Progress

"Ben," wrote a busy father, "emulate Benjamin Franklin, who said: 'To learn the value of money, borrow it.'"

In due time the boy at college replied: "Dear Dad, I did as you suggested. Borrowed \$50 from my roommate. What do I do next?"

More than two dozen species of orchids grow wild in the region around Chicago.

Power Of Sun Rays

Amount Of Sunburn In Sunlight Measured By Machine

Government scientists of the United States have successfully tested a machine which measures the amount of sunburn in sunlight.

Dr. W. W. Cobbett, internationally famous radiation expert of the National Bureau of Standards, has perfected the machine which measures the ultraviolet rays of sunlight which cause sunburn and tanning. The machine is known technically as a portable precision ultraviolet ray meter.

Ultraviolet rays comprise less than a thousandth of the total radiation coming from the sun, Dr. Cobbett said. Yet these particular rays are strong enough to scorch the skin with only several hours exposure during the summer months. The rays also are used in treating rickets.

Tests have been made at Washington and San Juan, Puerto Rico. Both are approximately at sea level and relatively free from smoke and dust. Dr. Cobbett pointed out that altitude and flying particles were factors in measuring solar radiation.

The "tanning" rays were somewhat stronger at San Juan than at Washington, but the comparative radiation studies made in the tropics which show that the sun, being directly overhead, has to send its light through less ozone in the stratosphere. Experts estimate that the sunlight reaching Washington has to travel through approximately five per cent more atmosphere than at San Juan, thus absorbing more ultraviolet rays.

Other tests performed at Flagstaff, Ariz., showed less ozone in the afternoon than in the morning and therefore a greater atmospheric transparency. Autumn was found to be more transparent than the spring, experts found.

Fog takes its share of the ultraviolet rays out of the sunlight and there is less possibility of tanning when humidity is high. It was found.

Physicians are interested in the device because of the curative power of the rays in cases of rickets, which is practically unknown in the tropics.

The present machine measures out the ultraviolet or "tanning" rays of the sunlight and accretions them quantitatively with the aid of a photo-electric cell.

See Market In Britain

Opportunity For Export Of Tuberculin-Free Cattle From Canada

Prevalence of bovine tuberculosis in Great Britain provides a great opportunity for Canadian cattle breeders to develop a large market for tuberculin-free cattle, Dr. Arthur Stephens, member of the British Medical Association, South Island, said at Toronto before entraining for Winnipeg.

Dr. Stephens is an adherent of the "Sixty per cent" rule, which states that 60 per cent of cattle in Great Britain show tuberculin in tests. Dr. Stephens stated, "Canada's development of a large market for tuberculin-free cattle can be reduced. For this reason and because opinion in Great Britain is changing in favor of tuberculin-free herds," he believes a wonderful opportunity exists to benefit both Canadian cattle-breeders and the British people."

A Modern Samson

Native Of India Earns Nickname With His Feats

N. K. Modi of Dumka, Bihar, India, has earned for himself—with good reason—the nickname of "Samson." Here are some of the feats he has recently accomplished:

Killed a buffalo by twisting its horns till its neck broke.

Struck a right, by himself, a gang of 40 bandits. Saved the life of his servant, who fell down a well. He was just in time to catch the man's left ankle with one hand as he disappeared over the edge, and he hauled him back with ease into safety.

Surplus Dairy Nations

New Zealand, Australia, Denmark, Netherlands, Canada, Italy and Switzerland appear to be the world's surplus dairy nations. The United Kingdom is the world market, supplemented by Germany in the case of butter, by the United States, Germany, and Belgium in cheese, and by a number of nations in condensed and evaporated milk.

The human eye responds to wave lengths of light from 380 to 760 millimeters of an inch long, which give a sensation of red.

The King's Reach

Section Of Thames Named In Honor Of Jubilee

The river Thames so far as it runs through the metropolitan district of London, is divided into a series of sections called "reaches." There is Chelsea Reach, Blackwall Reach, Greenwich Reach, Gallions Reach and so on, but one section appeared to have escaped being named, a deficiency which has just been rectified in honor of the King's silver jubilee. This is the stretch between the Pool of London, so familiar in pictures, just west of the Tower Bridge, and Lambeth Reach, which terminates on the Houses of Parliament side of Westminster Bridge. The Port of London Authority has decided to call it "The King's Reach."

Once upon a time the Thames was more used as the King's Highway than the road itself between Westminster and the Tower of London, the royal residence, St. James Palace being at one end while His Majesty sat at business at the Tower. Sometimes very dirty business at that. So that "The King's Reach" is an appropriate name for this important waterway. It includes London Bridge, Southwark Bridge, Blackfriars Bridge, Waterloo Bridge and Whitehall Bridge. The Thames is as much noted places as Billingsgate Fish Market, Cannon street railway station, St. Paul's Cathedral, Victoria Embankment, including Cleopatra's Needle, Somerset House, where wills are filed and all the births, deaths and marriages in England are registered, Charing Cross and Scotland Yard.

So if you should happen to be in Old London and lean over the parapet somewhere between the Houses of Parliament and the Tower looking at what the Thames calls "liquid history," that part is "The King's Reach."—St. Thomas Times-Journal.

Gave Address On Slang

Professor Of English Says It Is Language On Trial

At the spring meeting of Yorkshire District University held at York House, J. H. Gratton, Professor of English Language and Philosophy in Liverpool University gave the address on slang, cant, and jargon. He said it was impossible to acquire a thorough knowledge of English without being familiar with slang and vulgarisms. Slang was language on trial, but no word or expression had any real meaning outside its context and the situation in which it occurred. Cant was originally the secret language of the underworld, and he decried jargon as language unintelligible out of its proper sphere. Consideration would show the absurdity of condemning slang unheard. Attempts had been made to classify it according to occupations. What he really wanted was more knowledge about the usage of sections of slang into general slang. Words which were started as slang had risen in value and become an essential part of our colloquial or literary vocabulary.

New Tower Telescope

At a solar tower telescope, the first of its kind in England and the only large astronomical telescope in the world with optical parts made entirely of glass, has been commissioned at the observatory in Oxford, England.

The liver in a human body is about seven times as large as necessary for the work the organ does.

THE CHRONICLE

TOWN & COUNTY

Bill Anderson arrived on Tuesday from Raymond and is visiting with his mother, Mrs. J. Anderson.

Hugh Ramsay arrived home last Thursday after spending the past year in British Columbia.

Miss Alta, daughter of Edmonton, is visiting at the home of Mr. and Mrs. L. Poxon.

John Strahan returned to Carbon on Tuesday after two months in Calgary, where he was employed by the Calgary Albertan.

J. M. MacDonald returned to Carbon on Tuesday evening from his holidays. School opens on Tuesday, September 1st, and Mr. will be right on the job.

Miss Collie, Princess Pat Beauty Products demonstrator, arrived on Monday and is working from McKibbin Drug Store.

Ernest Wall of Herberts, Sask. came in on Monday and spent a couple of days with Mr. and Mrs. Aaron Klassen. Mr. Wall has just completed his hike of "10,000 miles on ten cents, and he still has the original ten cent piece he started out with.

FOR SALE OR TRADE—2 Milk Cows, one Shorthorn, the other a Jersey strain.—Apply F. Lemay, Carbon.

Aaron Balogh was a Calgary visitor this week and returned to Carbon on Tuesday's bus.

Cornie Friesen took a pleasure trip to the eastern end of the Red Bus Line on Wednesday.

Farmers are now looking for harvest help and the going wage for stokers is from \$2 to \$2.25.

Cheap excursion fares being offered by the railways to Coast points are now in effect and many Albertans are taking advantage of the offer and are away for a holiday.

"The mines have been working for a few days during the past week and it looks as if the coal trade may get under way almost any day now."

A new, large culvert was put in at the foot of front street last week, in preparation for the highway, which is to follow this route through town.

IN MEMORIAM

In loving memory of Harry Poxon, who died August 22nd, 1934.

"The blow was great, the shock severe. We little thought his death so near; Only those that have lost can tell The sorrow of that heart so true."

Devotedly remembered by
Mr. and Mrs. F.J. Besant
and Cyril

2nd and 4th Sundays in month, 7.30 a.m.
5th Sunday in month by arrangement.
REV. S. EVANS, in charge

Miss Betty McQuade left Saturday for Edmonton to spend a short holiday.

Alex Reid expects to leave tomorrow for a couple of weeks holiday at Vancouver and Victoria.

You'd think by our front page that we were a strong Conservative paper. Not much! We have respect for their news when it is news, but we can't see eye to eye with their policies.

Miss Annabelle Ramsey returned to Edmonton on Saturday after spending the past two weeks visiting with her parents in Carbon.

Snicklefritz ----

"Does your father preach the same sermon twice?"

"Yes, but he holds it in different places."

Judge—What were you doing at that roadhouse when it was raided?
Lokomith—I was making a bolt for the door.

"But surely," cried Jean, "you didn't tell him straight out that you loved him?"

"Goodness, no," Mildred said. "He had to squeeze it out of me."

Jim: "What is college bred, father?"
Father, with son in college: They make college bred, my boy, from the force of youth and the dough of old nose.

Rose—When you called up my number and told her I would be detained at the office and would not be home until very late, what did she say?
Steno—She said, "Can I depend on that?"

A steward stood at the manœuvre of a big liner, and as he stood there he kept shouting for the benefit of the arriving passengers:

"First class to the right! Second class to the left!"

A young woman stopped suddenly about with a "babe" in her arms. As she hesitated before the steward he bent over her and said, in his chivalrous way: "First or second?"

"Oh!" said the girl, her face as red as a rose. "Oh, dear, neither—I'm only the nurse."

THIS IS CONFIDENTIAL

Some unknown genius in the United States has prepared an estimate of the result of the "New Deal" combined with the famous or notorious Townsend pension plan. He gives it the title of "Confidential Memorandum on the State of the Nation."

It is as follows:
Population of the United States reported as 124,000,000
Deduct those eligible for old age pensions under the Townsend Bill 39,000,000

Deduct persons working for Federal, State, City and other governments 20,000,000

Deduct those ineligible to work under child labor 60,000,000

Deduct number of unemployed nation 13,999,999

Number remaining to produce nation's goods..... 2
Just You and Me—and I'm getting tired

The United States has the happy faculty of being able to laugh its freak schemes into their proper place—The Saskatchewan Star.

SOCIAL CREDITOR ORDERS
MCGEE PLANE OFF FIELD

KEEVER'S LAKE—Challenged on landing in a field at Three Hills, Man.

yer McLeer, K.C., of Vancouver, flying to a Liberal meeting, was told he could not land there as it was a "Social Credit" field. In this McLeer's outfit? the challenger asked, receiving an affirmative reply.

"You can't land here," the Social Credit said. "This is a Social Credit field."

"Had I known that I wouldn't have landed here in the first place," was

Major McLeer's retort.
Promptly the pilot soared into the air and landed in a remote field.
